

Heart Attack Symptoms

Not all heart attacks are sudden and intense. Many start slowly, allowing a man to doubt what is happening. Paying attention to the warning signs your body is sending could save your life. If you think you might be having a heart attack, call 9-1-1.

- Chest pain, discomfort, squeezing or pressure. Most heart attacks involve discomfort in the center of the chest that lasts more than a few minutes, or that goes away and comes back.
- Unusual upper body pain or discomfort in one or both arms, back, neck, jaw or stomach
- Shortness of breath, with or without chest discomfort
- Other signs may include breaking out in a cold sweat, nausea or lightheadedness
